

**Detail for Jeff Mobley - Consultant, Designer, General Contractor, Specialty Installer**[Send to Printer](#)**Description of Services, Products, Qualifications**

Efficient Home Constuction has been serving North Carolina for 5+ years. With the rising concerns over our energy use and its effects on our environment and our finance, we've expanded Efficient Home Construction into offering energy efficient solutions to our customers. In doing so, we have done extensive research into renewable energy and energy conservation which led us to NCSU Solar Center and Global Resource Options, Inc. GRO will bring to us reliable product services and also design/engineering/business support. Our staff can provide software design of new home construction with energy saving in mind with added energy production with solar power as a finishing touch to meet your needs and the furture in our changing environment. We can also handle commerical needs as well with construction and solar.
