

SOLAR WATER HEATING: POOLS (CLOSED LOOP)

HOW IT WORKS

When there is sufficient heat to be drawn from the collectors, the pool controller automatically activates the pumps and circulates the heated solar fluid. The solar fluid will pass through a heat exchanger, transferring its heat to the pool water passing through the exchanger. The heated pool water is then circulated through a filter and back into the pool while the solar fluid is circulated back to the collectors to be reheated. This circulation loop will continue as long as there is heat to be drawn from the collectors.

WHAT'S INCLUDED

- Pool controller
- Pool pump group components
- Heat exchanger
- Expansion tank
- Glycol (heat transfer fluid)
- DOS discs

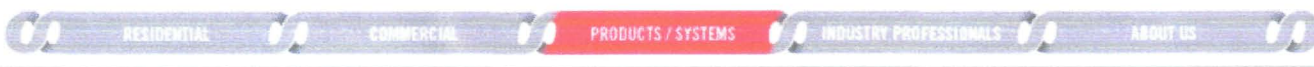

STANDARD PACKAGE Pool Area:	100 ft2	200 ft2	400 ft2	600 ft2	800 ft2
Number of Collectors	2	4	4	6	8
Blue Sputter Collector Type	GOBI 406 001	GOBI 406 001	GOBI 410 001	GOBI 410 001	GOBI 410 001
Controller (LX 220B)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Heat Exchanger	PHEX 032 000	PHEX 032 000	PHEX 032 000	PHEX 052 000	PHEX 052 000
Pool Pump Group	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
BTU Metering	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Roof Mounted Components

Heating Components

Solar pool heating is the most economical method to heat your pool and extend the swim season. The versatile design of our pool system allows it to be installed in any region for indoor and outdoor use. Because we use a closed loop design, the system offers you the highest amount of durability and longevity.

Features:

- All components included (less piping)
- Year-round pool heating
- Closed loop system prevents corrosion from harmful pool chemicals
- Freeze and boil-out protection without the need for draining
